PROJECTS

Laundry to Go App Prototype Project

- Conducted user research to identify target customers and create customer personas to understand customer needs and challenges.
- Developed user stories based on customer pain points and translated them into detailed UX prototypes.
- Created wireframes, mockups and interactive prototypes using tools like Figma.

Personal Website Projects

- Stock MA Tracker: Developed a tool to analyze stock prices using both the 5-day and 10-day moving averages. Libraries: Pandas, Numpy, Matplotlib
- I Spy Game: Developed an interactive web-based game using HTML, CSS, and JavaScript.
- Digital Clock: Built a real-time digital clock in React using useState and useEffect for dynamic time updates, with AM/PM formatting and efficient cleanup for performance.

EXPERIENCE

Growth Engineer Intern Nov. 2023 – Jan. 2024
Verus, USA Remote

- Developed responsive user dashboards using HTML and CSS to display personalized wellness content based on quiz results.
- Created interactive financial tracker dashboards with modern JavaScript frameworks to show key financial metrics, revenue/expense breakdowns, and real-time cash flow visualization.

Sous Chef

BaganHood, Taipei, Taiwan Sept. 2020 – Aug. 2021

- Supervised ingredient preparation, cooking techniques, and dish presentation to ensure top culinary standards while mentoring kitchen staff, managing conflicts, and providing guidance to cooks and assistants.
- Developed and adjusted new menu items while creating Standard Operation Procedures to seamlessly integrate them into kitchen operations.
- Collaborated with front-of-house staff to address kitchen-related issues and ensure smooth service and customer satisfaction.

LEADERSHIP

Team Captain

Da Yeh Women Basketball Team, Changhua, Taiwan

- Collaborated with the coach to manage a 16-member team, including establishing playing strategies and resolving team conflicts.
- Earned second place in National Business Major Women Basketball Cup.
